

## **Dr. Niki Mofidi R4**

### **Tell us about yourself.**

My name is Niki Mofidi. I'm a PGY-4 Resident in Psychiatry at Queen's University. I did my medical school training at Queen's University also, so I've lived in Kingston for the last 7 years. My academic interests include teaching and most of my research is focused around internalizing disorders in adolescents. I plan to pursue subspecialty training in child and adolescent psychiatry.

### **If you were not a psychiatrist what would you be doing?**

Writing plays, doing stand-up comedy or some profession where you can be completely honest with people.

### **What is your favourite sound?**

The sound of sincere laughter.

### **Describe the colour yellow to someone who hasn't seen the colour.**

It's the colour of happy. Not the colour of deep contentment, but the colour happy.

### **Where would you like to live if you could live anywhere?**

I would live in Bordeaux, because I love the people and the vibe of the city.
