FROM THE HEAD

It is with great pleasure that I invite you to review the 2015-2016 Annual Report for the Department of Psychiatry at Queen's University and affiliated teaching hospitals and community partners.

The report summarizes the life of the department during the year and highlights the many achievements. I would like to take this opportunity to thank all member of the Department for their dedication and hard work. The Department of Psychiatry provides the majority of psychiatric clinical services in Kingston and the vicinity. Our faculty members deliver high quality, evidence-based clinical services and are also skilled and committed educators for undergraduate, postgraduate and continuing medical education. The Department's research output has increased significantly over the last few years and is reflected in the increased number of grants and peer-reviewed publications.

Enjoy!

ROUMEN MILEV

undergraduate

EDUCATION

Overview

The Undergraduate Education Program in Psychiatry oversees the delivery of psychiatry teaching across the four years of medical school. In addition, a number of our faculty teach clinical skills, lead facilitated small group learning and supervise critical enquiry groups, thus increasing the profile of psychiatry in the Undergraduate Medicine Program. The psychiatry curriculum is a competency-based curriculum, introduced in first year and progressing longitudinally across the four years in a relevant integrated manner.

Developments

Reviews of the clerkship and pre-clerkship courses have been very positive. We continue to develop more effective teaching and assessment practices.

The psychiatry interest group is lead this year by the first-year medical students, Stanislav Pasyk and Lyubov Bryushkova. Staff support is provided by Drs. Casi Cabrera and Rick Millson. There have been two lunch-time meetings so far this year. The first, which occurred on November 10th, 2015, was on "Choosing Psychiatry as a Career". It was a panel discussion by practicing psychiatrists and was well attended by first and second year medical students. The second talk was given by Dr. Millson on an overview of psychotherapy.

Education

A new FSGL (Facilitated Small Group Learning) case was developed for the Term 4 Psychiatry module focusing on the themes of acute confusion in young adults and first episode of psychosis.

A new wellness curriculum spanning four years has been developed, focusing on resilience.

Third and fourth year medical students continue to be taught in many locations. In addition to all three hospitals in Kingston, students go to hospitals in Brockville, Oshawa, and Markham. Students who do the Integrated Program have additional psychiatric supervision in the community in Brockville.

Administration/Leadership

Dr. Rick Millson has taken on the role of clerkship director. Drs. Nisha Wijeratne and Neeraj Bajaj have taken over the position of pre-clerkship co-directors. Dr. Fitzpatrick will mentor them through their first year.

A number of faculties have taken on significant roles in the Undergraduate Medical Program. Dr. Cherie Jones is the Director of Clinical Skills for the Queen's Medical School and Dr. Renee Fitzpatrick is the Director of Student Affairs.

Undergraduate Psychiatry Prizes

Prizes awarded to medical students were awarded as outlined below:

The Virginia Parker Prize – Leads Class in Psychiatry:

Prize was shared between Kristen McAlpine and Ashwin Ramasubbu

The Professor's Prize in Psychiatry – Highest Mark in

Psychiatry: Prize was shared between Osbert Zalay and Eve Purdy

The John Wong Award was awarded to Ashwin Ramasubbu

postgraduate

MEDICAL EDUCATION

Overview

The Residency Program Committee (RPC) is responsible for the planning and implementation of the postgraduate education in Canada in accordance with the requirements of the Royal College of Physicians and Surgeons of Canada (RCPSC). Reporting directly to the Academic Affairs Committee and the Chair of the Department, the RPC is also responsible for the content of the curriculum and all evaluation procedures. The Committee meets monthly and is chaired by the Program Director (PD).

The main responsibilities of the RPC are designated to **Portfolio Managers** (PMs). The PMs assume leadership for tasks of the RPC such as Curriculum and Academic-half-day planning and review and CaRMS selection process. Each PM reports to the monthly RPC meeting.

Since 2014, our Program introduced the roles of **Academic Advisors**. Each faculty-psychiatrist RPC member is responsible for overlooking the training of 6-7 residents, documenting their progress, assisting with their CanMEDS portfolio and identifying areas of strengths and weaknesses.

Developments

The Psychiatry Residency Program welcomed six PGY-1's to the Residency Program in July of 2015: Sarah Adams, Jamey Adirim, Anees Bahji, Catherine Bobek, Marie Gojmerac, Amer Sapru and Jen Wong. Five residents: Nam Doan, Mitra Monir Abassi, Barinder Singh, Nisha Wijeratne and Daniela Volochniouk all passed their RCPSC exams and graduated from our program in 2015.

In October of 2015, the Program underwent a successful Internal Review mandated by Queen's University and the Royal College. Many strengths of the program were identified including the leadership, strong support for resident research including funding and appropriate oversight, innovative "portfolio manager" structure within the RPC, with Academic

Advisor capacity model in the RPC allowing for effective resident training and feedback.

The Program is actively participating in the transition to Competency-Based Medical Education. Several members of the RPC participate in the Department of Psychiatry CBME sub-committee.

Education

Residents are involved in the development and implementation of the curriculum which includes academic seminars, small group teaching sessions and workshops that promote interactive resident and faculty participation. Residents are encouraged to pursue their interest in teaching junior colleagues and students. The Program has provided protected time every Wednesday from 1 – 4:30 for residents to attend their academic teaching which include Interviewing Skills, OSCEs as well as core seminars. Residents attend courses in Cognitive Behaviour Therapy (Dr. M. David), interpersonal psychotherapy (P. Kasurak). One of the major strengths of the psychotherapy program is the ongoing Supportive Psychotherapy Course for second year residents organized by Dr. L. Flynn.

Research

Residents were actively involved in research activities in 2015. Research was presented at the APA, CPA, EPA and Department of Psychiatry Research Day.

Administration/Leadership

The RPC and the Program Director are responsible for the following:

- 1 To establish or revise general policies and objectives of the residency training program;
- 2 To consistently monitor accreditation standards are being met. This includes ongoing assessment of the educational program, including review of resources, and the individual components of the teaching program;

- 3** Coordinating the selection of applicants for admission to the program through an established process;
- 4** To ensure a sound resident evaluation and promotion process and provide a mechanism of appeal on issues of evaluation and training;
- 5** Regular review and maintenance of the curriculum;
- 6** Promoting communication between faculty and residents on matters relating to the Residency Training Program;
- 7** To ensure that resident evaluation of faculty is conducted in a timely, confidential manner monitored by the Program Director;
- 8** To ensure residents are provided opportunities to attain all competencies as outlined in the RCPSC Objectives of Training in Psychiatry;
- 9** To establish mechanisms to provide career planning and counselling for residents.

Faculty

DEVELOPMENT

Overview

The Faculty Development Planning Committee shall be advisory to the Department of Psychiatry Council, Queen's University regarding planning of educational activities that will support academic roles of persons working within the programs of the department. This includes psychiatrists and allied health professionals engaged in the academic mission of the department.

Its primary role is to support the academic development of the department by facilitating and encouraging teaching and scholarship. The focus will be on:

- Teaching Skills Development
- Career Development
- Faculty development presentations/seminars on Enhancing student motivation, Professionalism, Preparing the Teaching Dossier
- Career planning with faculty

Developments

The focus of our activities this year was on improving the communication with our trainees and enhancing the effectiveness of the feedback provided to the students and residents thus amend the training process in the department.

A New Faculty mentoring working group was established. The mandate of this group is to find implement a model that would best suit the department in facilitating the integration of new faculty in the departmental culture, enhancing professional productivity and improving retention.

Administration/Leadership

Chair: Dr. Alina Marin

Members: Dr. Casi Cabrera, Dr. Susan Ilkov-Moor, Dr. Jessica Jones, Mr. Paul Kasurak, Dr. Sarosh Khalid-Khan

research

REPORT

Overview

The department has a wide range of research and clinical studies resources. Our research units have well-developed infrastructure to support our studies and well-trained staff that have many years of both clinical and research experience.

Research Day

Our annual research conference was held on June 24, 2015 at the Donald Gordon Centre. There were approximately 80 people in attendance. We were able to hold break-out sessions again this year. Dr. Daniel Blumberger came from the Centre for Addiction and Mental Health in Toronto. Dr. Blumberger's talk was entitled "Brain Stimulation Treatments for Depression: Recent Advances and Future Directions". This talk was well received.

2015 Department of Psychiatry Research Grants

The Department of Psychiatry continues to set aside \$20,000 each year for Research Assistance Grants (approximately \$2,000 per grant) to assist with any aspect of a research project. The following individuals received awards for their research:

Title of Project	Primary Investigator	Amount
Prazosin Treatment of Nightmares	Y. Xie	\$ 1,200
Operational Stress Injuries in Firefighters, Emergency First Responders, and Corrections workers	D. Groll	\$ 2,000
Falling Through the Cracks	M. Rivera	\$ 2,000
Outcome Measures for Short Intensive Mental health Day Treatment Program	N. Bajaj	\$ 400
The Use of Standardized Patients in Years 2 and 4 of Residency	R. Fitzpatrick	\$ 1,920
Website for Individuals with Schizophrenia	T. Kim	\$ 500
SWEP Student Compensation	X. Liu	\$ 2,000
Prejudiced Attitudes Towards Aboriginals in Healthcare	P.S. Reddy	\$ 2,000
Serum Vitamin C	R. Millson	\$ 3,102
Eating Disorders: Journey from DSM IV to 5	P. Nadkarni	\$ 2,000
RESOLVE Video	F. Naeem	\$ 1,000
Prazosin for Sleep Disturbances in Adults with PTSD	D. Khachatryan	\$ 1,000
Diagnostic Test Accuracy of Depression	D. Seitz	\$ 2,000
TOTAL		\$21,122

We held the second competition for larger grants. The purpose of these grants is to provide funding to projects that are expected to lead to applications to external granting agencies and/or increase collaborations with other research groups and agencies. The following individuals received funding for their studies:

Grant PI	Title	Awarded
F. Iftene	Mental Disorders in Adults with Childhood Out-of-Home Placements	\$ 15,000
F. Naeem	Cognitive Behavioural Therapy (CBT) Based Guided Self-help for Patients With Psychosis	\$ 19,673
D. Seitz	Incidence and Risk Factors for Mental Health Disorders for Older Adults Following Acute Care Hospitalizations: A Population-Based Cohort Study	\$ 20,000
P.S. Reddy	Tool Development for Assessing the Risks Associated with Psychopharmaceutical Agents Use in Children: A Pilot Study with Atomoxetine	\$ 20,000
M. Rivera	Online Dialectical Behavioural Therapy. The New Method of Delivering Psychotherapy to Patients With Borderline Personality Disorder	\$ 20,000
N. Roberts	Preventing Aggression in 8-12 Year Old Boys Exposed to Family Violence: 12 Month Outcome Study of Classroom Based Prevention Program	\$ 29,000
TOTAL		\$123,673

Developments

Dr. Julia Kirkham received first prize for her poster "Meta-Analysis of Problem Solving Therapy for Older Adults with Depression" at the American Association for Geriatric Psychiatry meeting last week in New Orleans. Her submission was selected as first out of 90 submissions in the Early Investigator category for the AAGP which is a highly competitive meeting.

Dr. Nazanin Alavi received the European Psychiatric Association Research award. Dr. Alavi also received the 2015 Resident Psychiatric Research Scholars Fellowship from the American Psychiatric Association.

Dr. Bola Odejaye, PGY 5 resident, received the Massachusetts General Hospital Public and Community Psychiatry Fellowship for the academic 2016/2017 year at Harvard University. This is a great achievement for a Queen's University resident

2015 Mood and Anxiety Disorders Conference

The 15th annual Mood and Anxiety Disorders conference was held on November 7, 2015 at the Donald Gordon Centre. It was well attended by over 130 psychiatrists, general practitioners and other mental health professionals.

Resident and Faculty Awards

Resident Awards

- **Best Presentation by a Resident**
Dr. Nazanin Alavi
- **Resident Teaching Award**
Dr. Nishardi Wijeratne and Dr. Rupy Johal
- **Outstanding Contribution to the Residency Training Program**
Dr. Nazanin Alavi and Dr. Selim Asmer
- **Resident Research Award**
Dr. Nazanin Alavi and Dr. Davit Khachatryan
- **Child Psychiatry Research Award**
Dr. Nazanin Alavi
- **Best Poster Award**
Dr. Davit Khachatryan

Faculty Awards

- **Faculty Excellence in Research**
Dr. Robert Hopkins
- **Jim Owen Faculty Teaching Award**
Dr. Moustafa Eid
- **Exemplary Service to the Department**
Dr. Eric Prost
- **Excellence in Clinical Service**
Dr. Casi Cabrera
- **Excellence in Undergraduate Teaching**
Dr. Casi Cabrera
- **Excellence in a Mentorship Role**
Dr. Simon O'Brien

synergy

The Department continues to publish *Synergy* twice yearly. This year, all the authors writing in our Spring/Summer edition were, for the first time, members of the Psychiatry Department here at Queen's University. Dr. Kenny's essay (the first in a trilogy) was chosen by *Queen's Quarterly* for publication, although that important national journal only occasionally reprints previously published pieces.

We continue to solicit and publish vigorous prose that reflects the true nature of psychiatry and psychology – areas of study and enjoyment that span the human experience.

New Treatment Track for Males	13

ADULT mental health

Overview

To provide specialized assessment, treatment and rehabilitation to adults with schizophrenia, mood disorders, personality disorders and dual diagnosis.

The management structure at Mental Health Services has changed. Darcy Woods-Fournier is now the Senior Director, Hospital Mental Health with responsibility for all inpatient beds at Providence Care. Karin Carmichael is now the Senior Director, Community Programs with responsibility for all outpatient programs.

Inpatient Services

At Providence Care, we currently have three inpatient units providing care to 60 clients. Two units focus on recovery, wellness and resilience, engaging the clients in intensive treatment, symptom management, improving functioning and living skills while engaging with supports to enable their return to the community. The third unit focuses on enabling recovery by providing positive behavioural techniques, skills acquisition and adapting the environment to enable success. In 2015, our occupancy rate was 97% with 21,373 patient days.

Some of our legacy clients have successfully transitioned to the community with supportive housing or long-term care. We will continue to work with clients to determine appropriate care plans and resources necessary to allow them to live in the community.

Actively working towards and planning for the move in June 2017 to two 30-bed units.

Krystal Mack is the Program Manager for all three inpatient units on Adult Mental Health.

Outpatient Services

With the departure of Yola Oczkowski, Terry Landry is the new Regional Director – Specialty Mental Health Services. His portfolio includes:

w ;UmY IUhUaYgYhn

- CIP Case Management currently has 60 clients
- PSR Case Management currently have 65 clients
- CIP and PSR Case Management has a combined wait list of 5

2 Collaborative Mental Health Services Outreach (CMHS)

- There are currently 241 clients receiving care at various rural communities through CMHS

3 Community Connections

- 52 clients participate in the Community Connections program which offers a supportive environment where clients can learn skills and coping strategies necessary for successful community living

4 Community Integration Program ACTT (CIP ACTT)

- CIP ACTT currently has 77 clients, 3 clients on wait list

5 Community High Intensity Treatment (CHITT)

- 105 clients on CHITT, currently no wait list
- Step down is needed for CHITT

6 Community Treatment Order (Belleville, Brockville and Kingston)

- There are currently 111 clients registered with a CTO

7 Dual Diagnosis Consultation Outreach Team (Belleville, Brockville and Kingston)

- There are 267 clients who have received support from DDCOT

8 ECT/TMS

- In 2015, there were 1,394 ECT treatments given at Mental Health Services and 20 at KGH
- In April 2015, the TMS protocol changed from Repetitive Transcranial Magnetic Stimulation (rTMS) to a new protocol – Intermittent Theta Burst Stimulation (iTBS). There were a total of 1,604 TMS treatments completed in 2015

9 Homes for Special Care (HSC)

- Homes for Special Care has 42 beds allocated, but currently there are only 25 beds available in the Kingston area – they are at full capacity

10 Mood Disorders Research and Treatment Services

- Currently 797 clients are being followed by Mood Disorders
- With the departure of two Clinical Fellows as well as Dr. Ruzickova's impending departure, wait times are expected to temporarily increase
- Dr. Kolar will have a Fellow start working with him in March

11 Mood Disorders Outreach – Belleville

- 36 on wait list to Dr. Weaver for Mood Disorders in Belleville

12 Mood Disorders Outreach – Lennox and Addington

- 11 on wait list to see Dr. Jokic for Mood Disorders in Napanee

13 Personality Disorders Service

- *Chrysalis* Day Program – no wait list, next group starts in May 2016
- *Managing Powerful Emotions* – 32 on the wait list, next session begins in May 2016. Online Managing Powerful Emotions (eMPE) is also in development
- *People Skills* – new community groups will be starting in April 2016
- *Mindfulness Group* – 14 on the wait list, next session begins May 2016
- *People Skills Group* – 14 on the wait list, next session begins May 2016
- Psychiatric Assessments – 12 people currently being processed

14 Psychiatric Rehabilitation Services (PSR ACTT)

90 clients currently, 5 clients on wait list

15 Telemedicine Metis

- 82 people have received care through Telemedicine Metis

Developments

Events

In cooperation with the Department of Psychiatry, a day long presentation "*A Day with the Consent and Capacity Board*" was given by Mr. Michael Newman and Dr. Gerry Shugar on September 9, 2015 with 47 people in attendance.

A two-day webcast featuring Dr. Anthony Bateman presenting on *Applications of Mentalization-Based Treatment to Special Populations* was held October 8-9, 2015 with 33 people in attendance.

In November 2015, Dr. P. Leichner and Dr. M. Rivera facilitated a client art exhibit "*There is a Crack in everything, that is how the Light Gets In*" in downtown Kingston which was very well received.

Staffing

Dr. Martina Ruzickova will be leaving the Mood Disorders Outpatient Services in March 2016.

Dr. Nada AlQattan and Dr. Enass Althagafi completed their fellowships with the Mood Disorders Services in 2015

Amalgamation

On April 1, 2015, **Addiction and Mental Health Services – Kingston, Frontenac, Lennox and Addington (AMHS-KFLA)** was formed following the amalgamation of Frontenac Community Mental Health and Addiction Services (FCMHAS) and Lennox and Addington Addiction and Community Mental Health Services (LAACMHS). These two organizations have over 60 years of experience and provide services to over 4,000 people in Kingston, Napanee, Amherstview, Northbrook, Sharbot Lake, Tamworth and Verona. They provide a client-centred model of care, in the areas of intensive case management, addiction services, housing, vocational services, court support, counselling, supporting independent living, family support and assertive community team follow-up.

ADULT psychiatry

Overview

The Adult Division (acute) provides acute adult psychiatric services for Kingston and the Southeastern Ontario region. The purpose of the division is to provide excellence in acute clinical psychiatric services, medical education and academic development grounded in a collaborative care model.

The acute care services of the Adult Division of Psychiatry is perhaps the hub of mental health and addiction services for Kingston and the surrounding region, interacting and liaising closely with all other components of the mental health and addiction services. In 2015, the acute care services of the Adult Division were comprised of 5 main programs: emergency and crisis psychiatry, acute inpatient services, consultation/liaison psychiatry, intensive transitional treatment program, and active outpatient services.

a Emergency and Crisis Psychiatry

Four staff psychiatrists each cover KGH ED and HDH urgent care centre one to two days a week. After hours and weekend coverage is on a rota for psychiatrists and medical learners. Emergency psychiatrists also work in other parts of the acute mental health and addiction services including community crisis and transitional case management teams, inpatient ward, outpatient program, ITTP. This helps facilitate transitions for patients and allows for flow and partnership.

Two Mental Health social workers and two addiction and mental health crisis workers work closely with emergency psychiatry to create an interprofessional team with community partnership. An active teaching rotation in emergency psychiatry is available to junior and senior psychiatry residents, emergency medicine and family medicine residents and clinical clerks. Emergency psychiatry teaching

rounds take place on a monthly basis. The RAPAS (Rapid Access to Psychiatric Assessment Services) is run by the SW and crisis worker team to facilitate rapid access to hospital and community based mental health and psychiatric services. RAPAS links very closely with ITTP and the Transitional Case Management Team at AMHS-KFLA.

Case conferences are organized and care plans developed for identified frequent users of hospital inpatient and emergency psychiatric services. A 24-hour call back program for patients seen in psychiatric emergency at KGH then discharged is being implemented.

b Inpatient Psychiatry

Burr 4 inpatient ward at KGH is comprised of a 7-bed intense observation area, 2 short stay beds, and a 28-bed ward with 2 over capacity beds for a total of 37 beds, or at over capacity, 39 beds. The ward is staffed by a multi-disciplinary team including 6 psychiatrists with access to consultation by geriatric psychiatry and developmental disabilities. Many learners complete rotations on Burr 4. There has been more implementation of groups on the ward, and active development of the PGY-2 core rotation to include teaching rounds and group experience. Senior residents have completed rotations on the ward as junior colleagues. There is active liaison with community mental health services, including participation of AMHS-KFLA workers in multidisciplinary rounds. Many patients are now discharged through the ITTP and onto community services.

We have recruited a family physician to the ward who is invaluable in dealing with medical co-morbidities of Burr 4 patients.

c Outpatient Psychiatry

Acute outpatient services is a very active, busy program that receives about 200 intake referrals per month. The outpatient services are comprised of 3 programs: general psychiatry, adult eating disorders program, and Head's Up, Early Intervention in Psychosis Program. The latter 2 are externally funded. General Psychiatry program includes a number of sub-specialty clinics: addiction psychiatry, mental health and the law, anxiety disorders, ADHD/bipolar disorder research clinic, reproductive psychiatry, shared care. Members of the multidisciplinary team run various therapy groups including a number of CBT-based and psychoeducation groups and relaxation training as well as DBT-based groups and concurrent disorders groups.

Members of the division provide shared care and local outreach to such agencies as: Street Health Centre, AMHS-KFLA, Queen's Family Health Team, Maple Family Health Team, Moose Factory and the James Bay region. Again, many learners at all levels of education complete rotations in acute outpatient services. There has been further development of the PGY-2 core rotation experience to consistently include participation in group therapies.

d Consultation/Liaison Psychiatry

Consultation-Liaison Psychiatry is responsible for delivering psychiatric services to adult inpatients of the Kingston General Hospital and St. Mary's of the Lake Hospital who manifest psychiatric symptoms as a result of, or in addition to, their medical issues. Consultation-Liaison Psychiatry also provides outpatient psychiatric services at HDH to those patients that have both medical and psychiatric conditions. In addition to providing clinical consultations within KGH, the team promotes active communication between the Department of Psychiatry and various Specialty Medical Services at the Kingston

General Hospital, Hotel Dieu Hospital and St. Mary's of the Lake Hospital. The CL team facilitates monthly teaching rounds and monthly geriatric psychiatry teaching rounds.

The CL psychiatry rotation is a mandatory rotation for the senior psychiatry residents. The CL service also provides teaching rotations to family medicine residents and clerks.

In 2015, the adult division and the geriatric psychiatry division partnered to create a geriatric psychiatry position at KGH working very closely with the Consultation-Liaison psychiatrists by also provides support and consultation to other parts of the Mental Health Program at KGH especially inpatients and emergency psychiatry.

e Intensive Transitional Treatment Program (ITTP)

The ITTP is a new program in our Division that started operation in September 2014. It is fully externally funded by the SEO LHIN. The ITTP is an intensive short term program that helps patients transition from the inpatient ward back into the community, seamlessly bridging patients to outpatient and community mental health services. The ITTP also accepts patients from the emergency department, outpatients, community and family physicians. The ITTP service can provide an alternative to hospitalization and effectively prevents many hospital admissions and readmissions and facilitates earlier discharge for patients.

The ITTP is a daily 4 week program run by a multidisciplinary team. The program is group oriented with CBT, psychoeducation, and DBT based groups that provide support and development of skills. The program is very flexible and included psychiatric care and psychological assessment as needed. There is an elective rotation for senior psychiatry residents available in ITTP. Group experience for PGY-2 residents can be offered in ITTP.

Developments

A warm welcome to Dr. Nishardi Wijeratne, Dr. Maria Hussain and Dr. Nam Doan, the new psychiatrists who have joined our division this year.

We were sorry to see a number of psychiatrists leave our division this year: Dr. Behnia Haghiri, Dr. Kevin Varley, Dr. Moustafa Eid, Dr. Shaimaa Abo-El Ella, Dr. Khalid Saeed, and Dr. Essam Abdelmotaal. We wish them well in their future endeavours.

Admission and discharge criteria have been developed for the adult inpatient wards at KGH. This was an initiative from the LEAN process workshop.

The adult division of psychiatry partnered with the geriatric psychiatry division to create a geriatric psychiatry position at KGH supporting primarily the Consultation-Liaison team, but also the inpatient and emergency psychiatry services. This is going very well and has been beneficial for patient care, patient flow, collaboration and resident education.

The SEO Mental Health and Addiction Redesign continues to move forward and Dr. Finch continues to be actively involved. Divisional members also provide invaluable input to the process.

Education

All members of the Adult Division of Psychiatry (acute) are actively involved in teaching and education at an undergraduate, postgraduate and professional development level. Members of the division actively supervise learners, provide case-based teaching rounds, provide resident seminars, provide psychotherapy supervision, act as examiners for mock exams, etc. Divisional members are also involved in teaching medical students in seminars, problem-based learning, clinical skills and mentoring. Off service residents, particularly Family Medicine and Emergency Medicine residents also complete rotations in the adult division.

Clinical clerk medical students rotate regularly through many of the rotations of the adult division. There are usually 2 clerks placed on emergency psychiatry, 1 on CL Psychiatry, 2 on inpatients and 1-2 in outpatients, usually EIP. In total, we are usually supervising 6-7 clinical clerks in rotations at any given time. In addition we participate in "psychiatry boot camp" for clinical clerks and observerships. Divisional members are also actively involved in teaching clinical skills courses and problem-based learning sessions to medical students.

Divisional members are actively involved in CPD teaching as well. Members provide CPD for the department, university, community and region. Dr. Naeem and Dr. Munshi have organized a debate series on topics of interest in Psychiatry.

The Division of Adult Psychiatry (acute) is responsible for teaching and supervising a number of core resident rotations including PGY-2 core rotations in inpatients and outpatient psychiatry, Consultation-Liaison Psychiatry, Emergency Psychiatry, Addictions Psychiatry and Shared Care. In addition, a number of elective rotations are available within the division including Early Intervention in Psychosis, ITTP and Eating Disorders.

Dr. Leslie Flynn has developed and implemented a supportive psychotherapy teaching and supervision clinic for PGY-2 residents, which has been well received.

Dr. Neeraj Bajaj has taken on the role of co-director of undergraduate education for the Department of Psychiatry. Dr. Eric Prost is a member of the Residency Program Committee, and is responsible for curriculum development. Dr. Alina Marin is director of continuing medical education and faculty development for the department. Dr. Susan Finch is a member of the Royal College Examination Board for Psychiatry. Dr. Leslie Flynn is the Vice Dean for Health Sciences Education, Queen's University School of Medicine.

Dr. Leslie Flynn is also very actively involved in medical education scholarship at a University, National and International level. She has been involved in a number of medical education conferences as an invited participant, presenter and on organizing committees. Dr. Farooq Naeem is involved in development of CBT diploma courses and workshops internationally.

Research

Members of the division are involved in a number of research projects in a variety of areas of interest including medical education. There are collaborations with other divisions within the department as well as with other departments and with the Centre for Neuroscience and other universities. Dr. Pallavi Nadkarni is the Divisional Director of Research and she has been working this year to coordinate research efforts within the division. One of the major initiatives we have commenced on is to bring standardized questionnaires and tools into all our clinical encounters. This will help further enhance clinical care, but also provide an ongoing database and allow for outcome monitoring.

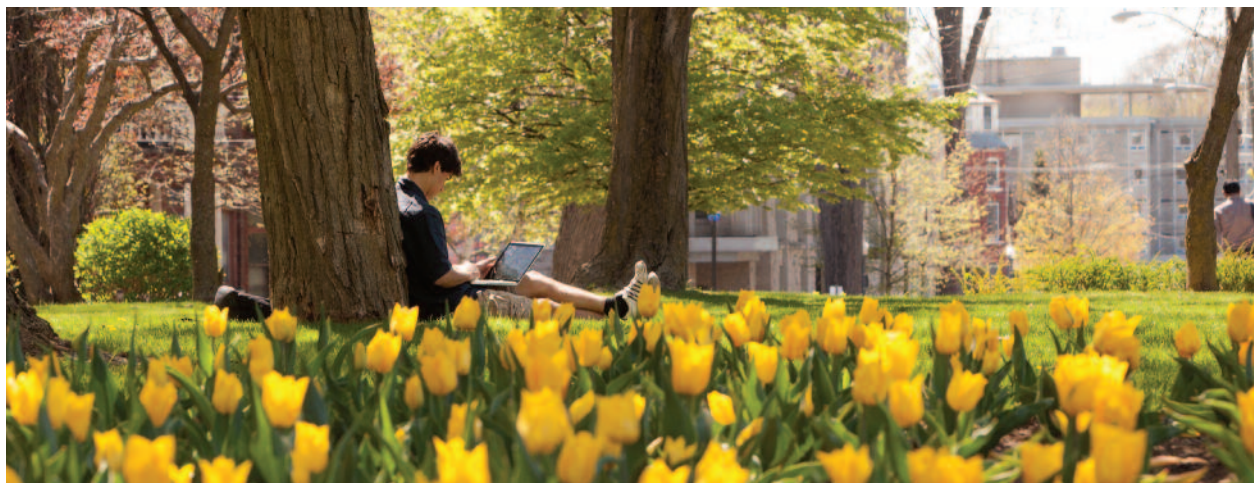

Awards

The ITTP received the KGH Team Leadership Award for 2015.

Administration/Leadership

For the Adult Division of Psychiatry, Dr. Finch is the Chair of the Division and Dr. Munshi is the inpatient director. Dr. Prost is outpatient director, Dr. Bajaj is ITTP director and Dr. Nadkarni is the research director.

Additionally, members of the Division are involved in administration and leadership positions at all levels including Departmental, School of Medicine, hospital, community, provincial, national and international.

CHILD AND ADOLESCENT psychiatry

Clinical

In the Mood and Anxiety clinic, an innovative group therapy has been piloted: Incorporating Mindful Self-Compassion Training (MSCT) into Cognitive-Behavioural Therapy (CBT) Groups for Adolescents with Anxiety Disorders.

In the Mood and Anxiety and Eating Disorders Clinic, an additional DBT informed adolescent group (Managing Powerful Emotions) was piloted in 2015 in collaboration with Providence Care and plans are going ahead for continuing this group.

Rexall Foundation provided \$27,300 for an Ontario Telemedicine Network (OTN) suite for the Child and Adolescent Mental Health Urgent Consult Clinic (CAMHUCC). This suite is being prepared and is expected to be fully functional by the end of March 2016.

The Southeastern Ontario LHIN has provided additional funding (\$150,000) for expansion of CAMHUCC to include children under the age of 12 years. They also provided \$175,000 in funding for a centralized triage project for Mood and Anxiety disorders.

RBC provided \$25,000 for expansion of the centralized triage project to include Neurodevelopmental Disorders.

A B'Nai Brith donation of \$150,000 that was received in 2014, has been fully utilized to renovate parts of the Child and Adolescent outpatient mental health at HDH. There is a new reception, waiting room, observation rooms and new toilets with easy access. New signage has been affixed.

Education

Dr. Shelly Dhaliwal is our first subspecialty resident. She will be starting her training in December 2016.

There are two international Child and Adolescent psychiatry fellows in the Division. Both have initiated and collaborated in research. Results of their research is being presented at the Departmental Research Day.

The Division continues to provide education for Pediatric and Family Medicine residents in addition to core Psychiatry residents.

External and internal to Queen's, clinical clerks and undergraduates have continued to choose our division for elective observerships.

DEVELOPMENTAL disabilities

Overview

Division members provide comprehensive clinical services across Southeastern Ontario through the Developmental Disabilities Consulting Program (DDCP), housed at Ongwanada, this inter-professional team offers multidisciplinary and discipline-specific “outreach” clinics beyond Kingston Frontenac Lennox and Addington to ensure that the small communities and rural areas across Southeastern Ontario (i.e. Hastings Prince Edward and Lanark Leeds Grenville) can also receive professional services as needed. Clinics are “collaborative and consultative” with care providers and thereby supportive of community advocacy with local practitioners and agencies across the region.

Interprofessional and Uniprofessional Outpatient Clinics (Child and Adult)

- Transitional Aged Youth Dual Diagnosis Clinic (SE region)
- Chronic Care Psychiatry Clinic
- Autism Assessment Clinics (SE region)
- Sensory Assessment Clinics (SE region)

Developments

Funding Achievements

- 1 Adapted Dialectical Behaviour Therapy (DBT) group for Individuals with Intellectual Disabilities and Emotional Dysregulation Difficulties (\$11,440.00) Department of Psychiatry, Queen’s University, Kingston.
- 2 Provincial Awareness of Developmental Disabilities in the Criminal Justice System: DS Expert Panel Project (\$17,0000) (Dr. J Jones co-investigator) Inter-ministerial Mental Health and Justice Committee.

Program Achievements

- 1 Recruited Dr. Nasar Sayeed Khan for psychiatry services.
- 2 Recruited Ashleigh Blinkhorn for Occupational Therapy services.

Education

Teaching Activities

In addition to departmental appointments, Division members have responsibilities in their discipline specific departments or school including undergraduate and postgraduate teaching. This arrangement allows for knowledge dissemination and cross-fertilization of ideas in the field of dual diagnosis and autism spectrum disorders. Students from different disciplines gain clinical experience with developmental disabilities and also benefit from working and learning within a collaborative, patient-centered healthcare team. The following teaching and educational initiatives were delivered in 2015.

Placement Opportunities for Queen's University Students -2015

Graduate/Pre-Licensure Training

- School of Rehabilitation Therapy: Occupational Therapy MSc OT – Clinical – (6) Danielle Fee, Emma Haley, Meghan Robertson, Sarah Mille, Varsha Jayaraman, Julie Bartens
- School of Rehabilitation Therapy: Occupational Therapy MSc OT – Community Dev – (2) Adam Broad, Ashleigh Blinkhorn
- Dept. of Psychology Clinical Practicum Placements for PhD Candidates – (1) Lyla Hall and Joyce Li
- Post-Doctoral Clinical Psychology Internship Program (KIC) – (1) Kimberley Armstrong
- School of Medicine: Psychiatry Residents and Fellows – (2) Dr. Al-Habbad, Dr. Nam Doan
- Post-graduate international supervision by Dr Muhammad Ayub (3) Arsalan Hassan, Nauman Mazhar, Warda Qureshi
- Family Medicine: PGY3 DD Training (1) Dr. Samantha Sacks
- Psychological Supervision: Undergraduate (6) Erin Young, Greg Allen, Katie Bremner, Leah Powers, Nicole Storms, Sarah Prevost

Interprofessional Teaching Activities

In addition to clinical training, the DDCP faculty are also involved in modeling and promoting an interprofessional education and practice model. In these activities there is an active and overt effort to have “clinicians from different professions” teach “students from different professions” so that interprofessional collaboration can inherent in the learning process. Even when teaching activities are specifically directed to a single discipline of students, the course material is jointly delivered by DDCP team members so as to model interprofessional teaching and practice.

1 School of Medicine: Developmental Disabilities Clinical skills Program

This year seminars were conducted daily for 6 weeks for clinical skills. Drs. Jones, Ayub and Meg McQueen participated in the seminars

2 Monthly seminar in Dual Diagnosis was offered to practitioners in Dual Diagnosis

These monthly one hour seminars were offered to clinicians working within developmental disability sector

3 Dual Diagnosis Clinical Teaching Rounds for Healthcare Students

Weekly seminars were offered to placement graduate students from psychiatry, psychology, occupational therapy and family medicine to provide interprofessional education and cross-fertilization of professional curriculum and roles.

Community Teaching Activities

- Jones, J. Risk assessment and management for people with Intellectual Disabilities and offending behaviour (two full day workshops)
- Ayub, M. Intellectual Disability and Personality disorder (one day workshop)

Overview

Regional Forensic Services

Providence Care, Regional Forensic Services Program provides specialized assessment, treatment, rehabilitation, and follow-up to people with severe psychiatric illness who come into conflict with the law.

Vision Statement

Providence Care Forensic Services will provide innovative and quality client services based on available best practices and the Recovery Model of Care. Creativity will be used in order to maximize available resources for research to enhance services available to clients in an efficient manner. By networking with our community partners, we will manage risk, reduce recidivism and support our clients with their complex needs on their journey to recovery.

Core Service Directions

The success of rehabilitation depends on several factors that are subsumed under two fundamental processes; developing skills that will help the individual avoid difficulties, and providing opportunities to engage in meaningful and constructive activities as an alternative. All parties must have clear role expectations and input into these processes.

Working with clients and their families to promote full community reintegration within the framework of the Criminal Code of Canada, the Forensic Services Program:

- Provides a recovery oriented environment in which clients may develop vocational and lifestyle options that support self-determined goals, positive relationships with others, and full participation in the social life of the community
- Provides an environment in which best practices are followed to facilitate the acquisition of the skills necessary to support independent community living
- Provides an environment of respect in which clients and all staff are empowered to participate in these goals

Successful reintegration depends on engaging the client with coordinated support services in the community that may span several agencies.

Working with our partners in the health, social service and criminal justice systems, the Forensic Services Program:

- Provides educational opportunities to reduce stigma and both heighten the level of awareness, and the skill level, of those responding to clients with legal problems arising in the context of major mental illness
- Provides consultation in areas of specialized forensic expertise
- Provides models of shared care service provision for this clientele
- Advocates for system efficiencies and integration and for continuity of care

Promoting excellence in the provision of services to forensic clients requires ongoing program evaluation, continuous quality improvement, research and education.

Working within the environment of a teaching hospital, the Forensic Service Program:

- Provides training at the community college and university undergraduate and graduate level, across the full spectrum of disciplines involved in our work
- Fosters information exchange and collaboration with academic programs less directly linked to our work
- Engages in collaborative and investigator-initiated research
- Ensures best practices through ongoing program evaluation

Forensic Services Program, Providence Care-Mental Health Services, Program Description:

- 30 bed inpatient unit
- Ambulatory care program that provides after care and clinical case management for NCR clients and other clients such as past NCR clients or At Risk clients

The program is part of the Division of Forensic Psychiatry, Queen's University.

Program Components

Forensic Rehabilitation

Provides ongoing rehabilitation and treatment for clients who have achieved a level of stability in their mental illness

- Increase clients' social, functional, and coping skills with the goal of reintegrating the client into the community

Forensic Assessment

5 assessment beds to determine:

- Fitness to stand trial-completed on site (and by video conference for the greater catchment area in the South East region)
- Criminal responsibility-NCR?
- If NCR monitor actuarial risk levels to determine probability of reoffending and provide treatment and stabilization for individuals in an acute phase of illness and individuals with extreme behavioural disturbances

Outpatient Services

- Specialized outpatient nurses provide services to forensic clients who have community access and to those who live in the community as registered outpatients
- Establish and maintain shared care agreements with community service providers for forensic clients living in the community
- All clients are under the jurisdiction of the Ontario Review Board

- At Risk Client-providing care to those at risk for re-hospitalization or incarceration who otherwise wouldn't have psychiatric or specialized forensic follow up

Transitional Case Management (component of the Outpatient Team)

- 2 Transitional Case Managers
- 1 with Mental Health Services
- 1 with Addiction and Mental Health Services – Kingston Frontenac Lennox and Addington (AMHS-KFLA)

At Risk Clients (component of the Outpatient Team)

Forensic programs may be of assistance with the management of high-risk behaviours by offering consultation to programs/physicians attending to these clients.

Forensic Mental Health Services in-patient services may be provided to civilly committed individuals with high-risk behaviours.

Diagnoses

- Schizophrenia
- Personality Disorder
- Brain Injury
- Mood/Affect Disorders
- Mental Retardation/Dual Diagnosis
- Concurrent Disorders
- Co-morbidity rate is high

Developments

- Forensic Retreat Follow Up (ongoing)
- At Risk Program, increase in intakes
- Forensic Program Committee
- Dual Diagnosis Program
- Emergency Restraint Task Force
- Development of Grading Risk of Inpatient Threat (GRIT)
- Hired Clinical Nurse Specialist
- Transitional Rehabilitation Housing Program (TRHP)

- Providence Care/Security/OPSEU meetings
- Métis Nation Clinics
- Dr. Jan Looman, hired in July 2015
- Lindsay Yarrow, Program Manager, hired November 2015
- Mental Health Court working group
- Accreditation
- New hospital build and planning ongoing
- Safewards
- WRAP – Wellness Recovery Action Plan
- Client who had been AWOL since June 2012 was returned to Providence Care in February 2015

Present Issues

- Continued growth of the forensic population of 5% per year and potential implications
- Continued pressure from the courts for assessment beds and use of “forthwith” orders
- Process for scheduling ORB hearings places more responsibility on the hospital to comply with section 672.5 (5) Criminal Code of Canada, Notice of hearing
- Grading Risk of Inpatient Threat (GRIT) Development and training to be expanded to include Adult Mental Health
- Waiting to see the impacts of bill C-54 on our program
- Client admitted to ICU in January 2016

Education

- CARMS
- ASIST training
- NCVI
- Grading Risk of Inpatient Threat (GRIT)
- CBT Training
- Safewards
- e-PR
- Medical dragon

The major areas of education offered in the past year have been the SBAR communication tool, Metabolic Syndrome and Diabetes, Best Practice for IM injections, Tb and Mantoux training, Med Reconciliation, Dual Diagnosis videoconferences and training, Least Restraint training, reviews of Suicide Assessment Tool, Mental Status examination and tool to prepare for GRIT education, Community Treatment Orders, and the Enhancing Our Relationships course. Training was done with new equipment; the Bladder Scanner, the suction machine, and the BP tower, Pinel Restraints

Administration/Leadership

- Forensic Directors Group
- Human Services and Justice Coordinating Committees (Regional and Local)
- Métis Clinic
- APCO (Association of Physicians in Corrections Ontario)
- Senior Clinical Team, Providence Care – MHS
- Professional Advisory Committee
- Addictions in the Community Committee
- Telepsychiatry – Dr. Michael Chan
- Medical Staff Association
- Department of Psychiatry Retreat
- Ongoing negotiations with Corrections Canada to establish the first Canadian Chair in Forensics and Corrections
- Academic/Research development related to external clinical review
- Senior Clinical Operations and Practice Committee

Stats

Average Telepsychiatry assessments per year:
115 (2015)

Overview

Inpatient Service

Our program continues to provide regional inpatient services for older adults with dementia within our 30 bed inpatient service at Providence Care. Our inpatient program consistently operates at capacity throughout the year and has a very successful transitional program for individuals who are discharged to community or long-term care settings following stabilization. Clinical support to the inpatient Behavioral Support Transition Unit at Quinte Health Care is provided through consultations provided by members of our Division and admissions to the Geriatric Psychiatry inpatient unit and BSTU are coordinated to provide timely access to inpatient services for older adults in our region. Our Division has also been actively involved with hospital redevelopment plans for the new Providence Care hospital which will include 30 beds for geriatric psychiatry.

Outpatient Service

Our clinical services continue to include three community-based outreach teams (centred in Kingston, Napanee, and Belleville), our outpatient program at Providence Care, and supports for our three long-term care Mobile Response Teams and Psychogeriatric Resource Consultants (situated in Lennox-Leeds and Grenville, Kingston, and Belleville). We received a total of 1,587 new referrals our community programs which is increased from previous years and reflecting the increased numbers of older adults with mental health needs in our region. Our Division is working on innovations in mental health care delivery both within our health region and beyond including development and enhancement of shared care models of care with both community and long-term care, telepsychiatry services, and enhanced collaboration with adult mental health for older adults with serious mental illness in long-term care settings. Discussions are currently in progress with colleagues in Geriatric Medicine and Neurology regarding development of a regional collaborative memory disorders program.

Education

Our division is continues to be very active in undergraduate, postgraduate, fellowship and continuing medical education and we have had a number of educational achievements in the past year.

Dr. Andrew continues to provide educational development support to the undergraduate medical education at Queen's University. Drs. Hussain, Andrew and Kirkham along with Nancy Timan have also been involved with undergraduate teaching for nursing students at Queen's university on the topic of the assessment and management of depression in older adults. We continue to support undergraduate research students in the Division through supervision of students in the EPI 499 honours project program. We have had several undergraduate medical students from Queen's University and from other universities complete observerships in our Division under the supervision of Dr. Andrew.

Our Division was successful in its application for a Geriatric Psychiatry Residency Program this past year with Dr. Maria Hussain starting as our first program director in July, 2015. We will be accepting our first Geriatric Psychiatry resident in July, 2016 and are in the process of recruiting additional trainees to our program. Our Division currently has an international clinical fellow Dr. Sana Kazim from Dubai who started her 2 year fellowship program in September, 2015. Dr. Andrew continues to be involved postgraduate medical education at Queen's University in her position of Director of Resident Affairs. Dr. Andrew also continues to provide significant contributions to postgraduate medical education at the national level through her position with the Royal College Geriatric Psychiatry Specialty Committee. Dr. Andrew will be leading our Geriatric Psychiatry residency program Competency Based Medical Education program redesign as part of Queen's University transition to CBME models of training.

Dr. Julia Kirkham, who joined our program in July, 2014 from the University of Saskatchewan completed her clinical fellowship at the end of 2015 and is currently completing a one-year research fellowship within our Division which will end in December, 2016. Dr. Kirkham received a fellowship award from Technology Evaluation in the Elderly Network (TVN) to support her research training over the next year. We currently have one MSc Epidemiology student, Mr. Clive Velkers affiliated with our program. Clive's thesis will examine the risk of cognitive adverse events following surgery and anesthesia and Clive also received a fellowship award from TVN.

On the continuing medical education front our faculty has also been very active. Our Division hosted a successful Geriatrics CME event in February with our colleagues in geriatric and family medicine in Kingston this past February which was well attended and received by our community partners. Our faculty has participated in a number of other CME activities this past year outside of Queen's. Over the past two years Dr. Seitz has been co-chair of the Canadian Academy of Geriatric Psychiatry Review Course and Online study course along with Dr. Mark Rapoport (University of Toronto) and Dr. Andrew Wiens (University of Ottawa). Dr. Seitz has also served as an editor on a Geriatric Psychiatry study guide which is being published by the University of Toronto press in the spring of 2016.

Research

Our Division continues to be very active in research. Our Division contributed to the publication of 9 peer-reviewed publications and over 15 presentations at national or international conferences during the past year. Members of our Division were also successful in obtaining research funding from the Canadian Institutes of Health Research for a systematic review of diagnostic testing accuracy of depression rating scales in dementia (Seitz, Kirkham, Le Clair) and from the SEAMO Innovation Fund (Seitz, Hussain) to examine the risk of dementia following surgery and anesthesia. Dr. Seitz became the Queen's University site lead for the Ontario Brain Institute – Ontario Neurodegenerative Disease Research Initiative study.

Administration/Leadership

Members of our Division participate in several local and national organizations. Our division members participate in our Department's Residency Program Committee, Quality Improvement Committee, Fellowship Committee, Research Committee, Competency Based Education Committee and Finance Committee. Dr. Andrew is also a member of the Care of Elderly residency program with geriatric medicine. Dr. Seitz is currently vice-president of the Canadian Academy of Geriatric Psychiatry and is co-chair for the Update in Geriatric Psychiatry and Geriatric Psychiatry Online Course.
